Availability list for 21 - 25 August (Week 34) 2017

Good and Happy Monday morning to you! Yay - springtime is here!!

It is certainly argyranthemum and osteospermum season and you will see from this list and photos that we have the pick of the country I would say!! **With 28 individual argy colours and 39 individual osteo colours available this week, you can be sure we can cater to any taste.** The warm days and cold nights mean compact plants that are covered in buds and flowers opening daily, the nursery is really looking 10/10 - come up for a visit if you've got time! :)

We are working especially hard this year on improving our efficiencies at the nursery with everything from production planning and processes to delivery schedules and order processing. To help us with this:

We would appreciate it if you could try to email all orders from now on, whether you fill in the Excel document that we send, save and then send it back, or fill in the PDF, scan and send back. This means that everyone including the nursery manager, dispatch manager, Jeremy and accounts will have a copy of your order.

ORDERING: Please ensure that your orders are in by Monday 2PM for delivery that same week. Pick-ups require at least 24 hours notice to make sure that we have enough time to pick your stock.

Order (trays)	Genus	Variety	Colours	Foliage Meter	Bud Meter	Flower Meter	Approx. Size	Description/Comment
---------------	-------	---------	---------	---------------	-----------	--------------	--------------	---------------------
